[EXPRESSED IN CANADIAN DOLLARS]

[Unless specified otherwise, amounts are expressed in Canadian dollars]

1. NATURE OF OPERATIONS

NanoXplore Inc., and its subsidiaries (together "NanoXplore" or the "Corporation"), is a graphene company, a manufacturer and supplier of high-volume graphene powder for use in industrial markets. Also, the Corporation provides standard and custom graphene-enhanced plastic and composite products to various customers in transportation, packaging, electronics, and other industrial sectors. The Corporation is also a silicon-graphene-enhanced Li-ion battery manufacturer for the Electric Vehicle ("EV") and grid storage markets. The Corporation was formed by amalgamation under the *Canada Business Corporations Act* by certificate of amalgamation dated September 21, 2017 and is headquartered at 4500 Thimens Blvd, Montreal, QC, Canada.

NanoXplore is listed on the Toronto Stock Exchange ("TSX") and traded under "GRA" and is also listed on the OTCQX and traded under "NNXPF".

The Corporation has two reportable segments based on products: Advanced materials, plastics and composite products and Battery cells [Note 20].

The consolidated financial statements of NanoXplore for the years ended June 30, 2024 and 2023 were reviewed, approved and authorized for issue by the Corporation's Board of Directors on September 18, 2024.

2. MATERIAL ACCOUNTING POLICIES

BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB").

The Corporation has consistently applied the accounting policies used in the preparation of its IFRS consolidated financial statements, including the comparative figures, except as further discussed in note 3.

BASIS OF MEASUREMENT

These consolidated financial statements have been prepared on a historical cost basis.

BASIS OF CONSOLIDATION

These consolidated financial statements include the accounts of the Corporation, which include:

a) Subsidiaries

Subsidiaries are all entities over which the Corporation has control. Control exists when the Corporation is exposed to, or has the rights to, variable returns from its involvement with the entity and has the ability to affect those returns through the power over the entity. The subsidiaries are fully consolidated from the date on which control is transferred to the Corporation. They are deconsolidated from the date that control ceases.

[EXPRESSED IN CANADIAN DOLLARS]

The Corporation has the following subsidiaries:

Subsidiaries	Reporting segment
NanoXplore Switzerland Holding SA ("NanoXplore Switzerland"), based in Switzerland, with an	Advanced materials,
equity interest of 100% [2023 – 100%]. NanoXplore Switzerland holds 100% of CEBO Injections	plastics and
SA ("CEBO")	composite
NanoXplore Holdings USA, Inc. ("NanoXplore Holdings USA"), based in the United States, with an	Advanced materials,
equity interest of 100% [2023 – 100%]. NanoXplore Holdings USA holds 100% of NanoXplore USA,	plastics and
Inc. [2023 – 100%] and RMC Advanced Technologies Inc. [2023 – nil].	composite
Sigma Industries Inc. ("Sigma"), based in Canada, with an equity interest of 100% [2023 – 100%].	Advanced materials,
Sigma has two active wholly owned subsidiaries; Faroex Ltd., based in Manitoba, and Rene	plastics and
Composite Materials Ltd., based in Quebec. Rene Composite Materials Ltd. owns no subsidiary	composite
[2023 – one active wholly owned subsidiary; RMC Advanced Technologies Inc., based in the United	
States, that is now owned by NanoXplore Holdings USA, Inc.]	
Canuck Compounders Inc. ("Canuck"), based in Canada, with an equity interest of 100%	Advanced materials,
[2023 – 100%]	plastics and
	composite
VoltaXplore Inc. ("VoltaXplore"), based in Canada, with an equity interest of 100% [2023 – 100%]	Battery cells

Intercompany transactions, balances, income and expenses on transactions between the Corporation's entities are eliminated. Profits and losses resulting from intercompany transactions that are recognized in assets are also eliminated.

b) Joint venture

A joint venture is a contractual agreement whereby the Corporation agrees with other parties to undertake an economic activity that is subject to joint control, i.e. strategic financial and operating decisions relating to the joint venture's activities require the unanimous consent of the parties sharing control. Investments in joint ventures are accounted for using the equity method. The share of earnings (loss) from joint ventures is recognized in the consolidated statement of loss and comprehensive loss. Management periodically reviews its joint ventures, for any indication of an impairment. The Corporation had no joint venture as at June 30, 2024 and 2023.

FOREIGN CURRENCY

a) Functional and presentation currency

NanoXplore's functional and presentation currency is the Canadian dollar. Functional currency is determined for each of the Corporation's entities, and items included in the consolidated financial statements of each entity are measured using that functional currency. All subsidiaries have the Canadian dollar as functional currency except for NanoXplore Switzerland and CEBO, which have Swiss Franc ("CHF") and for RMC Advanced Technologies Inc., NanoXplore Holdings USA and NanoXplore USA Inc which have US dollars. The assets and liabilities of foreign operations are translated into Canadian dollars at the rate of exchange prevailing at the reporting date, and their statements of operations are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on the translation are recognized in other comprehensive loss.

b) Transactions and balances

Monetary assets and liabilities denominated in foreign currencies are translated at the prevailing exchange rate at the reporting date. Non-monetary assets and liabilities, and revenue and expense items denominated in foreign currencies are translated into the functional currency using the exchange rate prevailing at the dates of the respective transactions. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in the consolidated statement of loss and comprehensive loss.

Foreign exchange gains and losses are presented in the consolidated statement of loss and comprehensive loss within "Foreign exchange".

[EXPRESSED IN CANADIAN DOLLARS]

REVENUE RECOGNITION

Revenues comprise the sale of manufactured products, tooling contracts and other income and are measured at the amounts specified in the customer's arrangement. Sales of manufactured products are recognized when products are delivered to the customer, which is also the moment when control of the products is transferred, and when there is no unfulfilled obligation that could affect the customer's acceptance of the products. Tooling contract revenues are measured based on the progress of the work. A receivable is recognized when the products are delivered or services are rendered, as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due. The Corporation does not expect to have any contracts where the period between the transfer of the promised products or services to the customer and payment by the customer exceeds one year. As a consequence, the Corporation does not adjust any of the transaction prices for the time value of money. Cash payments received or advances due pursuant to contractual arrangements are recorded as contract liability until all of the foregoing conditions of revenue recognition have been met.

If the Corporation has recognized revenues, but not issued an invoice, then the entitlement to consideration is recognized as a contract asset presented as Accounts receivable on the Corporation's consolidated statement of financial position. The contract asset is transferred to trade receivables when the invoice is issued indicating that the entitlement to payment has become unconditional. If payments are received, or invoices are issued to a customer, prior to the rendering of services, the Corporation recognizes a contract liability under the caption Contract liability on the Corporation's consolidated statement of financial position. The contract liability is transferred to revenues once related services have been deemed rendered.

Other income comprises mainly of government assistance.

GOVERNMENT ASSISTANCE

The Corporation periodically receives government assistance under government incentive programs and refundable investment tax credits. Government assistance, other than non refundable tax credits, is recognized initially as a deferred contribution at fair value when there is reasonable assurance that it will be received, and the Corporation will comply with the conditions associated with the assistance. It is recognized as other income in the consolidated statement of loss and comprehensive loss when there is a reasonable assurance that it will be received.

Non refundable investment tax credits are recognized as a reduction of the income tax in the consolidated statement of loss and comprehensive loss when there is reasonable assurance that it will be received, and the Corporation will comply with the conditions associated with the assistance and to the extent that it is probable that future profit will be available against which the non refundable investment tax credits can be used.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash on hand, deposits held with banks and other highly liquid short-term investments with original maturities of three months or less or that can be redeemed at any time without penalty.

FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are recognized when the Corporation becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Corporation has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when the obligation specified in the contract is discharged, cancelled or expired.

The Corporation classifies its financial instruments into the following categories:

a) Financial assets at amortized cost

Financial assets at amortized cost comprise of cash and cash equivalents and trade and other receivables. The Corporation's financial assets at amortized cost are included in current assets due to their short-term nature. Financial assets at amortized cost are initially recognized at the amount expected to be received, less, when material, a discount to reduce the financial assets to fair value. Subsequently, they are measured at amortized cost using the effective interest method less a provision for impairment. For trade receivables, the Corporation applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognized from initial recognition of the receivables. The Corporation assumes that there is no significant increase in credit risk for instruments that have a low credit risk.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED JUNE 30, 2024 AND 2023

[EXPRESSED IN CANADIAN DOLLARS]

Financial liabilities at amortized cost

Financial liabilities at amortized cost comprise operating loans, trade payables and accrued liabilities, and long-term debt. Financial liabilities at amortized cost are initially recognized at the amount required to be paid, less, when material, a discount to reduce the payables to fair value. Subsequently, accounts payable and accrued liabilities are measured at amortized cost using the effective interest method. These are classified as current liabilities if payment is due within 12 months. Otherwise, they are presented as non-current liabilities.

c) Financial liabilities at fair value through profit or loss

A specific accounting methodology is required for derivatives designated as hedging instruments in cash flow hedge relationships or in a net investment in a foreign operation. To qualify for hedge accounting, the hedging relationship must meet several strict conditions with respect to documentation, probability of occurrence of the hedged transaction and hedge effectiveness. All derivative instruments used for hedge accounting are recognized initially at fair value and reported subsequently at fair value in the consolidated statements of financial position. To the extent that the hedge is effective, gains and losses of derivatives designated as hedging instruments in cash flow hedges or in a net investment in a foreign operation are recognized in other comprehensive loss and included in Foreign currency translation reserve in equity. Any ineffectiveness in the hedge relationship is recognized immediately in the consolidated statements of loss.

At the time the hedged item affects profit or loss, any gain previously recognized in other comprehensive loss is reclassified from equity to the consolidated statements of loss and presented as a reclassification adjustment within other comprehensive loss. However, if a nonfinancial asset or liability is recognized as a result of the hedged transaction, the gains and losses previously recognized in other comprehensive loss are included in the initial measurement of the hedged item. If a forecast transaction is no longer expected to occur or if the hedging instrument becomes ineffective, any related gain or loss recognized in other comprehensive loss is transferred immediately to the consolidated statements of loss. All other derivative financial instruments are accounted for at fair value through profit or loss.

The Corporation has not provided the required documentation regarding the identification, designation and effectiveness of forward exchange contracts pursuant to hedge accounting. Therefore, the Corporation's forward exchange contracts that are used to cover the anticipated sales denominated in foreign currencies are recorded at fair value through profit or loss. Foreign exchange gains or losses are recognized in the consolidated statements of loss.

INVENTORY

Inventory is stated at the lower of cost and net realizable value. Cost is determined using the weighted average cost method, or the first-in-first-out method, depending on the nature on the inventory. Cost includes all expenditures directly attributable to the manufacturing process as well as suitable portions of related production overheads based on a normal operating capacity. Net realizable value is the estimated selling price in the ordinary course of business less costs of completion and any applicable selling expenses. When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in net realizable value because of changed economic circumstances, the amount of the impairment is reversed (i.e. the reversal is limited to the amount of the original impairment) so that the new carrying amount is the lower of the cost and the revised net realizable value.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment ("PPE") are recorded at cost, less accumulated depreciation and accumulated impairment losses, if applicable. Property, plant and equipment are depreciated using the straight-line method over their estimated useful lives, taking into account any residual values. Their useful lives are as follows:

Not depreciated Land Building 20 to 35 years Production equipment 2 to 25 years Leasehold improvements Lease term Laboratory, computer, office equipment and rolling stock 2 to 10 years

Residual values, method of depreciation and useful lives of the assets are reviewed annually and adjusted if appropriate. An item of PPE is de-recognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in profit or loss in the consolidated statement of loss and comprehensive

[EXPRESSED IN CANADIAN DOLLARS]

[LAI NEGGED IN CANADIAN DOLLANG]

loss. Where an item of PPE consists of major components with different useful lives, the components are accounted for as separate items of property, plant and equipment. Expenditures incurred to replace a component of an item of PPE that is accounted for separately, including major inspection and overhaul expenditures, are capitalized.

INTANGIBLE ASSETS

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if applicable. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the consolidated statement of loss and comprehensive loss.

Identifiable intangible assets are recorded at cost and amortized using the methods mentioned below and over the period of their expected useful lives as follows:

Customer relationshipStraight-line10 yearsTechnologyStraight-line10 yearsPatents, licenses and softwareStraight-line5 and 10 years

GOODWILL

Goodwill represents the excess of the consideration transferred for the acquired businesses over the estimated fair value at the acquisition date of net identifiable assets acquired. Goodwill is not subject to amortization and is carried at cost less accumulated impairment loss but is tested for impairment on an annual basis or more frequently if events or circumstances indicate that it might be impaired.

For the purpose of impairment testing, goodwill is allocated to each cash generating unit ("CGU") expected to benefit from the synergies of the combination. CGUs to which goodwill has been allocated are tested for impairment annually or more frequently if events or circumstances indicate that the carrying value may not be recoverable. If the higher of the recoverable amount of the CGU's fair value less costs to sell (FVLCS), or its value in use is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit prorata on the basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill cannot be reversed in a subsequent period.

IMPAIRMENT OF NON-FINANCIAL ASSETS

Non-financial assets are reviewed for impairment if there is any indication that the carrying amount may not be recoverable. If any such indication is present, the recoverable amount of the asset is estimated in order to determine whether impairment exists. Where the asset does not generate cash flows that are independent from other assets, the Corporation estimates the recoverable amount of the asset group to which the asset belongs.

An asset's recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value, using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or asset group is estimated to be less than its carrying amount, the carrying amount is reduced to the recoverable amount. Impairment is recognized immediately as additional depreciation or amortization. Where an impairment subsequently reverses, the carrying amount is increased to the revised estimate of the recoverable amount, but only to the extent that this does not exceed the carrying value that would have been determined had no impairment been previously recognized. A reversal is recognized as a reduction in the depreciation or amortization charge for the period.

[EXPRESSED IN CANADIAN DOLLARS]

RESEARCH AND DEVELOPMENT EXPENSES

Research and development expenses are charged to the consolidated statement of loss and comprehensive loss in the period they are incurred unless certain criteria are met.

An internally generated intangible asset arising from development (or from the development phase of an internal project) is recognized if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditures attributable to the intangible asset during its development.

To date, the Corporation has not capitalized any development costs.

Research and development expenses presented on the consolidated statement of loss and comprehensive loss comprise the costs to manufacture graphene and to support our sales team and research on graphene's properties. It includes costs of external consultants supporting research on graphene, employee compensation and other operating expenses involved in research and development activities.

LEASES

Leases are initially measured at cost and subsequently depreciated. Initial measurement of costs is determined by the amount of the initial measurement of the lease liability, less any lease inducements receivable and any lease payments made at or before the commencement date, plus any initial direct costs, and any restoration costs. The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Corporation's incremental borrowing rate. The lease liability is subsequently measured using a constant periodic rate of interest on the remaining balance of the lease liability and is subsequently adjusted for interest and lease payments. The Corporation has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less, and leases of low-value assets. The Corporation recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

INCOME TAX

Income tax comprises current and deferred tax. Income tax is recognized in the consolidated statement of loss and comprehensive loss except to the extent that it relates to items recognized directly in other comprehensive loss or in equity, in which case the income tax is also recognized directly in other comprehensive loss or equity, respectively.

Current income tax is the expected tax payable on the taxable income for the year using tax rates enacted or substantively enacted at the end of the reporting period and any adjustment to tax payable in respect of previous years.

In general, deferred income tax is recognized with respect to temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred income tax is not recognized if it arises from the initial recognition of goodwill or the initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit nor loss.

Deferred income tax is determined on a non-discounted basis using tax rates and laws enacted or substantively enacted at the consolidated statement of financial position date and that are expected to apply when the deferred tax asset is realized or liability is settled. Deferred tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be used. Deferred tax assets and liabilities are presented as non-current.

PROVISIONS

A provision is recognized when the Corporation has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognized for future operating losses.

one item included in the same class of obligations may be small.

[EXPRESSED IN CANADIAN DOLLARS]

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pretax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense.

EMPLOYEE FUTURE BENEFITS

The Corporation offers a defined benefit pension plan to certain non-Canadian employees. The net periodic pension expense for this plan is actuarially determined on an annual basis by an independent actuary using the projected unit credit method. The determination of benefit expense requires assumptions such as the discount rate to measure obligations, expected mortality and expected rate of future compensation. Actual results will differ from estimated results based on assumptions. The vested portion of past service cost arising from plan amendments is recognized immediately in the statement of loss and comprehensive loss. The unvested portion is amortized on a straight-line basis over the average remaining period until the benefits vest. The liability recognized in the consolidated statements of financial position is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets, together with adjustments for unrecognized past service costs. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that have terms to maturity approximating the term of the related pension liability. All actuarial gains and losses that arise in calculating the present value of the defined benefit obligation and the fair value of plan assets are recognized immediately in other comprehensive loss and included in the consolidated statement of loss and comprehensive loss.

If the fund is in deficit as per the Swiss law, the collective foundation, responsible for the management of the fund, could potentially ask for an equal contribution from the employer, employee and pensioners, which creates an actuarial obligation under IAS 19 even if the outflow of economic resources is not probable.

Contributions to defined contribution pension plans are expensed as incurred, which is as the related employee service is rendered.

SHARE CAPITAL

Common shares are classified as equity. Incremental costs directly attributable to the issuance of shares are recorded as a deduction from the proceeds in equity in the period in which the shares are issued.

SHARE-BASED COMPENSATION

The fair value of stock options granted to employees is recognized as an expense, over the vesting period with a corresponding increase in the reserve. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee, including directors of the Corporation. Share-based payments to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined that the fair value of the goods or services cannot be reliably measured and are recorded at the date on which the goods or services are received.

The fair value is measured at the grant date and recognized over the period during which the stock options vest. The fair value of options granted is measured using the Black-Scholes option pricing model, taking into account the terms and conditions upon which the options were granted. Determination of the grant date fair value requires management estimates such as risk-free interest rate, volatility and weighted average expected life.

At each consolidated statement of financial position date, the amount recognized as an expense is adjusted to reflect the actual number of stock options that are expected to vest. On exercise of a stock option, any amount related to the initial value of the stock option, along with the proceeds from exercise, are reclassified from reserve to share capital.

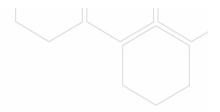

LOSS PER SHARE

Basic loss per share is based on the weighted average number of common shares outstanding of the Corporation during the year. The diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding stock options, in the weighted average number of common shares outstanding during the year, if dilutive.

SIGNIFICANT MANAGEMENT ESTIMATES AND JUDGMENTS IN APPLYING ACCOUNTING POLICIES

[EXPRESSED IN CANADIAN DOLLARS]

The following are significant management judgments used in applying the accounting policies of the Corporation that have the most significant effect on the consolidated financial statements. When preparing the consolidated financial statements, management undertakes a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, revenues and expenses. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about the significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, revenues and expenses are discussed below.

a) Government assistance and SR&ED

Government assistance is accounted for as other income during the year in which the costs are incurred, provided that the Corporation is reasonably certain based on management's judgment that the government assistance will be received. Government assistance must be examined and approved by the tax authorities, and it is possible that the amounts granted will differ from the amounts recorded by management. In cases where it would be reasonable to believe that certain amounts collected would have to be repaid, a provision is taken.

b) Assets acquisition

Management applied significant judgment in estimating the fair value of the intangible assets acquired in connection with the VoltaXplore assets acquisition detailed in Note 4a. To estimate the fair value of the intangible assets acquired, management mainly used the relief from royalty method. The significant assumptions used by management in estimating the fair value of the intangible assets are the royalty rate, the revenue forecast and the discount rate.

c) Impairment of property, plant and equipment, goodwill and intangible assets

An impairment loss is recognized for the amount by which the asset or CGU exceeds its recoverable amount. To determine the recoverable amount, management estimates expected future cash flows from each asset or CGU and determines a suitable interest rate in order to calculate the present value of those cash flows. In the process of measuring expected future cash flows, management makes assumptions about future gross profits. These assumptions relate to future events and circumstances. The actual results may vary and may cause significant adjustments to the Corporation's assets during the next financial years. In most cases, the determination of the discount rate involves estimating the appropriate adjustment to market risk and the appropriate adjustment to asset-specific risk factors.

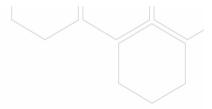

d) Revenue recognition on separately priced tooling contracts

Tooling contract prices are generally fixed; however, price changes, change orders and program cancellations may affect the ultimate amount of revenue recorded with respect to a contract. Revenue is recognized as the work progresses, which is calculated using the costs incurred to date and the total estimated contract costs. Contract costs are estimated at the time of signing the contract and are reviewed at each reporting date. Adjustments to the original estimates of total contract costs are often required as work progresses under the contract and as experience is gained, even though the scope of the work under the contract may not change. When the current estimates of total contract revenue and total contract costs indicate a loss, a provision for the entire loss on the contract is recorded in the period in which the loss is determined. Factors that are considered in arriving at the forecasted loss on a contract include, amongst others, cost over-runs, non-reimbursable costs, change orders and potential price changes.

e) Deferred tax assets

Management exercises judgment in the assessment of the probability of future taxable income, to estimate the extent to which deferred income tax assets can be realized. Estimates are based on the Corporation's most recently approved budget forecast, which is adjusted for significant non-taxable income and expenses and specific limits to the use of any unused tax loss or credit. The tax rules and tax planning strategies in the numerous jurisdictions in which the Corporation operates are carefully taken into consideration. Management uses judgment to assess specific facts and circumstances to assess legal or economic limits or other uncertainties and to determine the number of years to include in the forecast period.

3. NEW ACCOUNTING STANDARDS

THE FOLLOWING STANDARDS AND AMENDMENTS TO EXISTING STANDARDS HAVE BEEN ADOPTED DURING THE LAST YEAR

Amendments to IAS 1 – Presentation of Financial Statements

On January 23, 2020, the IASB issued amendments to IAS 1, *Presentation of Financial Statements*, to clarify the requirements for classifying liabilities as current or non-current. More specifically, the amendments specify that the conditions which exist at the end of the reporting period are those which will be used to determine if a right to defer settlement of a liability exists. Management expectations about events after the consolidated statement of financial position date, for example on whether a covenant will be breached, or whether early settlement will take place, are not relevant; and the amendments clarify the situations that are considered settlement of a liability.

On February 12, 2021, the IASB issued amendments to IAS 1, *Presentation of Financial Statements*, to add a requirement to disclose the material accounting policy information, instead of significant accounting policies. The amendment also clarifies that accounting policy information is expected to be material if, without it, the users of the financial statements would be unable to understand other material information in the financial statements.

There has been no impact on the adoption of these amendments as at July 1st, 2023

Amendments to IAS 8 - Accounting policies, Changes in Accounting Estimates and Errors

On February 12, 2021, the ISAB issued amendments to IAS 8 that introduce a definition of accounting estimates and provide clarifications to distinguish accounting policies from accounting estimates. There has been no impact on the adoption of this amendment as at July 1st, 2023.

THE FOLLOWING STANDARDS AND AMENDMENTS TO EXISTING STANDARDS HAVE BEEN PUBLISHED, AND THEIR ADOPTION IS MANDATORY FOR FUTURE ACCOUNTING PERIODS

Amendments to IAS 7 - Statement of Cash Flows and to IFRS 7 - Financial Instruments: Disclosures

On May 25, 2023, the IASB issued the final amendments to IAS 7 and IFRS 7 which address the disclosure requirements to enhance the transparency of supplier finance arrangements and their effects on a company's liabilities, cash flows and exposure to liquidity risk. The new guidance will be effective for annual periods starting on or after January 1, 2024. Management has not yet determined the impact, if any, for the Corporation.

Amendments to IAS 18 - Presentation and Disclosure in Financial Statements

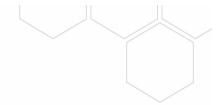

On April 9, 2024 the IASB issued IFRS 18, *Presentation and Disclosure in Financial Statements* to improve reporting of financial performance. IFRS 18 replaces IAS 1 Presentation of Financial Statements. It carries forward many requirements from IAS 1 unchanged. IFRS 18 applies for annual reporting periods beginning on or after January 1, 2027. Earlier application is permitted.

The new accounting Standard introduces significant changes to the structure of a company's income statement and new principles for aggregation and disaggregation of information. The main impacts of the new accounting Standard include:

- introducing a newly defined "operating profit" subtotal and a requirement for all income and expenses to be allocated between three distinct categories based on the company's main business activities: Operating, investing and financing;
- Disclosure about management performance measures; and,
- Adding new principles for aggregation and disaggregation of information;
- Requiring the cash flow statement to start with operating profit; and remove the accounting policy for presentation of dividend and interest.

Management has not yet determined the impact, if any, for the Corporation.

[EXPRESSED IN CANADIAN DOLLARS]

Amendments to IFRS 9 - Financial Instruments and IFRS 7 - Financial Instruments: Disclosures

In May 2024, amendments to IFRS 9, Financial Instruments and IFRS 7, Financial Instruments: Disclosures were issued. The main impacts of the amendments include:

- clarification of the timing of recognition and derecognition for a financial asset or financial liability, including clarifying
 that a financial liability is derecognized on the settlement date. In addition to these clarifications, the amendments
 introduce an accounting policy choice to derecognize financial liabilities settled using an electronic payment system
 before the settlement date, if criteria are met;
- clarifications regarding the classification of financial assets, including those with features linked to environmental, social
 and corporate governance and contractual cash flows that are solely payments of principal and interest on the principal
 amount outstanding; and
- additional disclosures are required for financial instruments with contingent features and investments in equity instruments classified at fair value through other comprehensive income.

These amendments are effective for annual reporting periods beginning on or after January 1, 2026. Early adoption is permitted, with an option to early adopt only the amendments to the classification of financial assets. Management has not yet determined the impact, if any, for the Corporation.

4. ASSETS ACQUISITION

a) VOLTAXPLORE

On April 14, 2021, NanoXplore and Martinrea Innovation Developments Inc., a wholly-owned subsidiary of Martinrea International Inc. ("Martinrea"), formed a joint venture through VoltaXplore, a battery-based initiative to service the electric transportation and grid storage market.

On March 24, 2023, NanoXplore Inc. purchased Martinrea Innovation Developments Inc.'s 50% equity stake in VoltaXplore for an aggregate equity consideration of \$9,987,586. NanoXplore now owns 100% of VoltaXplore.

The VoltaXplore acquisition has been recorded as an acquisition of assets as VoltaXplore does not meet the definition of a business under IFRS 3, *Business Combinations*. The assets acquired and liabilities assumed were initially recognized applying a cost accumulation approach.

The consideration paid and the allocation to the net assets acquired are summarized as follow:

	>
Net identifiable assets acquired:	
Cash	329,823
Accounts receivable and contract asset	37,127
Prepaid expenses and other assets	57,185
Lease deposits	60,066
Equipment deposits	236,291
Right-of-use assets	1,183,379
Property, plant and equipment	7,264,853
Intangible assets	6,717,680
	15,886,404
Accounts payable and accrued liabilities	(328,054)
Lease liability	(1,391,870)
Advance from NanoXplore Inc.	(1,000,000)
	(2,719,924)
Net assets acquired	13,166,480

[EXPRESSED IN CANADIAN DOLLARS]

Consideration paid	
Common shares issuance	9,987,586
50% equity stake previously owned	3,178,894
Total consideration paid	13,166,480

b) XG Sciences Inc.

On August 24, 2022, the Corporation purchased a significant portion of the assets of XG Sciences Inc. ("XG") for an amount of \$3,894,900 [US\$3,000,000] in a sale conducted by XG's senior secured creditor pursuant to Article 9 of Michigan's enactment of the Uniform Commercial Code. The Corporation and the senior creditor have entered into an asset purchase agreement pursuant to which NanoXplore is acquiring XG's mechanical milling platform, research and development lab and all issued and pending patents and trademarks, among other items. To account for the transaction, the Corporation has estimated the value of the assets acquired and recorded such value in the inventory, property, plant and equipment and intangible assets based on this estimate.

5. ACCOUNTS RECEIVABLE AND CONTRACT ASSET

	2024 \$	2023 \$
Trade receivables Minus: Allowance for doubtful accounts	21,088,302 (185,435)	19,194,635 (259,107)
Government receivables	20,902,867 2,949,390	18,935,528 1,336,988
Contract asset [Note 11] Other receivables	919,314 183,599	157,696 175,529
	24,955,170	20,605,741

The Corporation reviews all amounts periodically for indication of impairment, and the expected credit loss has been provided for as allowance for doubtful accounts. Trade accounts receivables are not past due, except for \$504,629 and \$258,461 [2023 – \$1,040,829 and \$1,064,971] that are outstanding, respectively, for the periods from 91 to 120 days and over 120 days.

The majority of the trade receivables are pledged as security for the credit facilities (Note 12).

6. INVENTORY

Raw materials and consumables Work in progress Finished goods

2024 \$	2023 \$
12,139,611	11,244,854
2,045,267	2,242,091
2,849,781	3,793,170
17,034,659	17,280,115

The Corporation expects full recovery of this amount in the next fiscal year. The majority of inventories is pledged as security for the credit facilities (*Note 12*). As net realizable value being higher than cost, there was no inventory write-down recorded as an expense and included in cost of sales for the years ended June 30, 2024 and 2023.

[EXPRESSED IN CANADIAN DOLLARS]

7. INVESTMENT IN A JOINT VENTURE

On April 14, 2021, NanoXplore and Martinrea Innovation Developments Inc., a wholly-owned subsidiary of Martinrea International Inc. ("Martinrea"), formed a joint venture through VoltaXplore, a battery-based initiative to service the electric transportation and grid storage market. VoltaXplore's main activities are research and development of Lithium-Ion battery cells enhanced with graphene for EV batteries.

On March 24, 2023, NanoXplore Inc. purchased Martinrea Innovation Developments Inc.'s 50% equity stake in VoltaXplore. VoltaXplore is now a wholly-owned subsidiary of the Corporation and its assets and liabilities are included in the consolidated statements of financial position and operating results are reflected in the consolidated statements of loss and comprehensive loss of the Corporation. The change in the investment in VoltaXplore is detailed as follows:

	\$	\$
Balance at the beginning	_	4,238,774

As at June 30, 2024				
Cost	8,578,730	6,688,953	3,509,940	18,777,623
Accumulated depreciation	(3,832,351)	(836,119)	(854,752)	(5,523,222)
Net book value	4,746,379	5,852,834	2,655,188	13,254,401

As at June 30, 2024, there are \$355,401 of software that are not yet available for use and for which amortization has not started [2023 - \$368,484].

b) Goodwill

Balance at the beginning Balance at the end

2024 \$	2023 \$	
1,919,673	1,919,673	
1,919,673	1,919,673	

For impairment testing, the carrying amount of goodwill was allocated to the Sigma cash generating unit ("CGU") for an amount of \$460,164 and to the Canuck CGU for an amount of \$1,459,509. The recoverable amount of each CGU was determined based on its value in use, which was calculated using pre-tax cash flow forecasts from the Board-approved budgets for the next fiscal year. The forecasts reflected past experience. Management believes that any reasonably possible change in the key assumptions on which the CGU's recoverable amount is based would not cause the CGU's carrying amount to exceed its recoverable amount. No impairment loss was recorded during the years ended June 30, 2024 and 2023.

[EXPRESSED IN CANADIAN DOLLARS]

The Corporation has the following credit lines with these banks:

i. Royal Bank of Canada:

On April 25, 2024, the Corporation entered into a new credit agreement which includes a revolving facility of \$10,000,000, a term facility of \$5,000,000, a leasing facility of \$30,000,000 (expandable to \$45,000,000 if covenants are met) and a legacy leasing facility of \$1,250,094 ("the "new facilities"). The new facilities can be use in either, Canadian dollar or in US dollar equivalent. The new credit agreement has a maturity date of April 25, 2026 with a possible extension of one year. The new facilities bear interest at a floating rate based on either, Canadian prime rate, US base rate, Secured Overnight Financing rate ("SOFR") or Canadian Overnight Repo rate average ("CORRA"), based on the type of draw, plus a spread based on the covenants. As of June 30, 2024, the Corporation had drawn \$4,472,322 under these new facilities and all applicable covenants were met.

ii. Banque Cantonale Vaudoise:

A credit facility agreement which authorized the Corporation a maximum operating loan of CHF 1,000,000 [\$1,522,700]. The operating loan bears interest at 5.57%. A general assignment of debtors has been given as security. Under this agreement, the Corporation has agreed to respect certain conditions and financial ratios. As of June 30, 2024, the Corporation had drawn CHF 1,000,000 [\$1,522,700] under this credit facility and all applicable covenants were met [2023 – CHF 1,000,000 [\$1,478,300]].

b) LONG-TERM DEBT

Several movable hypothecs on specific assets of the Corporation and its subsidiaries and on the universality of the Corporation's present and future tangible and intangible assets have been given as security for these term loans and credit facilities. Under these agreements, the Corporation has agreed to meet certain conditions and financial ratios. As at June 30, 2024, all conditions and financial ratios were met.

13. EMPLOYEE BENEFITS OBLIGATION

DEFINED BENEFIT PENSION PLAN

The Corporation offers a defined benefit pension plan to all Swiss employees.

Employees are eligible for this plan if they meet certain conditions. Depending on the age, salary and the applicable pension fund, ordinary contributions are directly deducted as a percentage from the salary. The Corporation contributes between 50% and 60% of the ordinary contributions for the employees. If the fund is in deficit as per the Swiss law, the collective foundation, responsible for the management of the fund, could potentially ask for an equal contribution from the employer, employee and pensioners, which creates an actuarial obligation under IAS 19 even if the outflow of economic resources is not probable.

The funded status of the benefits and the amounts recorded in the consolidated statements of financial position were as follows:

Plan assets at fair value Defined benefit liabilities **Retirement benefit deficit**

\$	\$
4,119,599 (4,659,197)	4,891,484 (5,463,947)
(539,598)	(572,463)

The amount for asset ceiling effect and for minimum funding requirement amounted to nil [2023 - nil].

The Corporation estimates to contribute \$203,798 to the defined benefit plan during the next fiscal year.

2023

2024

[EXPRESSED IN CANADIAN DOLLARS]

The actuarial assumptions used to determine the Corporation's pension plan benefit obligation and expense were as follows:

	2024	2023
Discount rate	1.4%	1.9%
Salary increase	1.0%	1.0%
Rate of increase in eligible earnings	0%	0%
Inflation	1.0%	1.0%
Long-term interest on retirement accounts	1.4%	1.9%
Mortality decrement and turnover rate	BVG / LPP 2020 GT Table	BVG / LPP 2020 GT Table
Disability decrement	85% BVG / LPP 2020 GT Table	85% BVG / LPP 2020 GT Table
Retirement	100% at regular retirement age	100% at regular retirement age

To determine the most suitable discount rate, management considers the interest rates for high-quality bonds issued by entities operating in Switzerland with cash flows that match the timing and amount of expected benefit payments. The mortality and disability rate are based on the available rate in Switzerland for private pension funds. The Corporation chose the salary increase and turnover rates to reflect our specific situation.

A 0.25% change in the significant actuarial assumptions below would have the following effects on the defined benefit obligation, all other actuarial assumptions remaining the same:

	0.25% increase \$	0.25% decrease \$
Discount rate	(161,415)	170,800
Salary increase	17,583	(19,136)

14. EQUITY

a) SHARE CAPITAL

Authorized

Unlimited number of common shares, without nominal or par value, entitled to vote, to receive dividends subject to the priority of payment of dividends attaching to the series of first preferred and second preferred shares, and in the event of liquidation or winding up, to receive the remaining assets of the Corporation.

Unlimited number of first preferred shares, without nominal or par value, not entitled to vote, issuable in series, entitled to receive dividends in priority to the holders of common shares and second preferred shares, and in the event of liquidation or winding up, to receive amounts the articles of the Corporation provide must be paid in priority to the holders of common shares and second preferred shares.

Unlimited number of second preferred shares, without nominal or par value, not entitled to vote, issuable in series, entitled to receive dividends in priority to the holders of common shares, and in the event of liquidation or winding up, to receive amounts the articles of the Corporation provide must be paid in priority to the holders of common shares.

Issued

There are no first preferred shares and second preferred shares issued and outstanding.

[EXPRESSED IN CANADIAN DOLLARS]

Issued and outstanding common shares are detailed as follows:

•	Number of		
	shares	\$	
Balance as at July 1, 2022	165,223,525	169,354,272	
Issuance of common shares in March 2023 [Note 4a]	3,420,406	9,962,936	
Exercise of stock options	734,500	991,495	
Balance as at June 30, 2023	169,378,431	180,308,703	
Exercise of stock options	1,230,000	2,374,500	
Balance as at June 30, 2024	170,608,431	182,683,203	

On March 24, 2023, NanoXplore Inc. issued 3,420,406 common shares to purchase from Martinrea Innovation Developments Inc. 50% equity stake in VoltaXplore for an aggregate equity consideration of \$9,987,586. The aggregate issuance costs related to the issuance, in the total amount of \$24,650 paid in cash were recorded as a reduction of share capital.

b) STOCK OPTIONS

The incentive stock option plan allows the Corporation to grant to employees, directors, officers and consultants options to purchase shares of the Corporation. The plan is a fixed plan of a maximum of 8,000,000 stock options. The terms and conditions of each option granted under the plan, including the vesting schedule and the expiry date, will be determined by the Board of Directors. The exercise price for any stock option shall be determined by the Board of Directors and shall not be lower than the market price of the underlying common shares at the time of grant.

The following table summarizes the changes in the number of stock options outstanding for the years ended June 30:

2024		2023	
	Weighted		Weighted
	average		average
	exercise price		exercise price
Number	(\$)	Number	(\$)
3,175,000	2.51	3,287,000	1.98
1,517,616	2.18	800,000	3.40
(1,230,000)	1.36	(734,500)	0.94
(645,000)	2.48	(66,666)	3.85
(175,000)	3.45	(110,834)	2.98
2,642,616	2.80	3,175,000	2.51
758,332	3.52	2,254,166	2.02
	3,175,000 1,517,616 (1,230,000) (645,000) (175,000) 2,642,616	Weighted average exercise price Number (\$) 3,175,000 2.51 1,517,616 2.18 (1,230,000) 1.36 (645,000) 2.48 (175,000) 3.45 2,642,616 2.80	Weighted average exercise price Number (\$) Number 3,175,000 2.51 3,287,000 1,517,616 2.18 800,000 (1,230,000) 1.36 (734,500) (645,000) 2.48 (66,666) (175,000) 3.45 (110,834) 2,642,616 2.80 3,175,000

During the year ended June 30, 2024, 1,517,616 options were granted. These options have an exercise price between \$1.93 and \$2.87 with a vesting period between one year and three years and a half and expiration date between five and ten years from the grant date. The exercise price is based on the share price the day prior to the grant.

During the year ended June 30, 2024, 1,230,000 options were exercised resulting in cash proceeds of \$1,672,800 and a transfer from "Reserve" to "Share capital" of \$701,700. The weighted average share price on the date of exercise of the options was \$2.15.

During the year ended June 30, 2023, 800,000 options were granted. These options have an exercise price between \$2.79 and \$3.68 with a vesting period between two and three years and a half and expiration date of five years from the grant date. The exercise price is based on the share price the day prior to the grant.

During the year ended June 30, 2023, 734,500 options were exercised resulting in cash proceeds of \$687,200 and a transfer from "Reserve" to "Share capital" of \$304,295. The weighted average share price on the date of exercise of the options was \$3.29.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED JUNE 30, 2024 AND 2023

[EXPRESSED IN CANADIAN DOLLARS]

At as June 30, 2024, stock options issued and outstanding by range of exercise price are as follows:

Ī	Options outstanding			Options	s exercisable
Range of exercise price (\$)	Remaining contractual life (in years)	Number outstanding	Weighted average exercise price (\$)	Number exercisable	Weighted average exercise price (\$)
1.93	4.44	217,616	1.93	=	=
2.14 - 2.87	7.91	1,400,000	2.23	133,333	2.47
3.12 - 3.85	2.70	925,000	3.59	574,999	3.62
5.27	2.61	100,000	5.27	50,000	5.27
	5.60	2,642,616	2.80	758,332	3.52

The fair value of the options granted was estimated using the Black-Scholes model. The weighted average inputs into the model and the resulting grant date fair values were as follows:

	2024	2023
Volatility	69.04%	69.61%
Risk-free interest rate	3.71%	3.00%
Expected life	60 to 120 months	60 months
Weighted average fair value of the option	\$1.55	\$2.02

The expected volatility was based on the Corporation's historical share price for the year ended 30, 2024 and 2023. There is no expected dividend yield.

15. REVENUES AND EXPENSES

The following table summarizes the details of the revenues for the years ended June 30:

	2024 \$	2023 \$
Sales of manufactured products	121,067,620	119,395,066
Tooling revenues	7,533,316	3,305,419

FOR THE YEARS ENDED JUNE 30, 2024 A

[EXPRESSED IN CANADIAN DOLLARS]

The deferred income tax assets are recognized, as the Corporation believes it is probable that taxable profits will be available in the future against which the tax loss carry forward can be utilized. However, some deferred tax assets have not been recognized because at this stage of the Corporation's development, it is not determinable that taxable profit will be available against which the Corporation can utilize deferred income tax assets. As at June 30, 2024 and 2023, significant components of the

Corporation's net unrecognized deductible temporary differences for which no deferred taxes have been recognized are:

Non-capital losses carried forward Property, plant and equipment Research and development Share issue costs Other assets Total deferred income tax assets

2024 \$	2023 \$
14 260 095	12.046.702
14,269,985 2,165,780	13,046,783 1,515,439

351,054	636,506
286,330	286,152
18,387,047	16,433,631

As at June 30, 2024, the year of expiry of operating losses for which no deferred income tax assets were recognized in the Consolidated Statements of Financial Position are as follows, presented by tax jurisdiction for Canada:

	Federal \$	Provincial \$
More than 10 years	58,001,328	58,677,015
2034	238,877	227,392
2033	280,508	280,448
2032	126,289	134,806
2031	56,354	56,354
2030	198,140	198,140
2029	129,776	129,743
2028	62,077	62,042
2027	4,756	2,408
Total	59,098,105	59,768,348

As at June 30 2024, the Corporation also has \$2,158,654 of accumulated losses in Switzerland, which will begin expiring in 2025.

As at June 30, 2024, the Corporation has accumulated non-refundable Federal SR&ED tax credits of \$1,223,780 which can be used to reduce income tax payable in the future, and will begin expiring as of 2033.

17. RELATED PARTY TRANSACTIONS

Martinrea is a shareholder of the Corporation with significant influence. Subsidiaries of Martinrea purchased graphene-enhanced products and tooling products from the Corporation during the year ended June 30, 2024 for an amount of \$2,100,003 [2023 – \$1,139,977]. As at June 30, 2024, an amount of \$170,088 due by Martinrea is included in Accounts receivable and contract assets [2023 – \$574,373].

During the year ended June 30, 2023, the Corporation has rendered services to VoltaXplore, prior to acquiring the second 50% equity stake on March 24, 2023 (*Note 4a*), for an amount of \$20,335. Since March 24, 2023, VoltaXplore is a wholly-owned subsidiary of the Corporation and its assets and liabilities are included in the consolidated statements of financial position and operating results are reflected in the consolidated statements of loss and comprehensive loss of the Corporation.

[EXPRESSED IN CANADIAN DOLLARS]

The remuneration of directors and key management personnel during the year was as follows:

Consulting fees, wages and salaries Director fees Share-based compensation – Management Share-based compensation – Directors

2024 \$	2023 \$
3,096,161	2,483,872
526,582	571,909
751,915	362,432
406,087	185,973
4,780,745	3,604,186

Key management employees are subject to employment agreements which provide for market standard payments on termination of employment without cause providing for payments between twelve and eighteen months of base salary. Minimum commitments under these agreements are approximately \$1,845,000. These agreements require that additional minimum payments of approximately \$3,618,000 be made upon the occurrence of certain events such as a change of control. As a triggering event has not taken place, the contingent payments have not been reflected in these consolidated financial statements.

18. COMMITMENTS

As at June 30, 2024, the Corporation held forward exchange contracts to sell for a minimum of US\$24.3 million and a maximum of US\$36.5 million depending on the exchange rate of such derivative contracts. Rates vary from 1.300 to up to 1.386. The contracts are valid until April 2026. As at June 30, 2024 and 2023, the carrying value of the derivative foreign currency forward exchange contracts is included in Accounts payable and accrued liabilities.

The Company has committed to purchase production equipment for a total amount of \$10,485,166 of which \$3,946,259 were paid and included in the consolidated statements of financial position as Equipment deposits as at June 30, 2024.

19. FINANCIAL INSTRUMENTS

The Corporation's risk exposures and the impact on the Corporation's financial instruments are summarized below.

FAIR VALUE RISK

IFRS requires that the Corporation disclose information about the fair value of its financial assets and financial liabilities. Fair value estimates are made based on relevant market information and information about the financial instrument. The Corporation is exposed to various financial risks resulting from its operations. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

The Corporation classifies its financial assets and financial liabilities measured at fair value into three levels according to the observability of the inputs used in their measurement.

The following assumptions and valuation methodologies have been used to measure the fair value of financial instruments:

- (i) The fair value of its short-term financial assets and financial liabilities, including cash and cash equivalents, trade and other receivables, operating loans, and trade payables, accrued liabilities and current portion of balance of purchase price, approximates their carrying value due to the short-term maturities of these instruments; and
- (ii) The fair value of long-term debt is estimated based on discounted cash flows using current interest rates for instruments with similar terms and remaining maturities. The Corporation categorized the fair value measurement in Level 3.
- (iii) The fair value of derivative foreign currency forward contracts is estimated based on mark-to-market value. The Corporation categorized the fair value measurement in Level 2, as it is derived from observable market inputs.

[EXPRESSED IN CANADIAN DOLLARS]

The carrying values and fair values of financial instruments, by class, are as follows as at June 30, 2024 and 2023:

	2024		2023	
	Carrying value	Fair value	Carrying value	Fair value
	\$	\$	\$	\$
Financial liabilities at amortized cost				
Long-term debt	6,346,503	6,346,503	7,875,888	7,875,888

CREDIT RISK

Credit risk refers to the possibility that a customer or counterparty will fail to fulfill its obligations under a contract and, as a result, create a financial loss for the Corporation. The Corporation has a credit policy that defines standard credit practice. This policy dictates that all new customer accounts be reviewed prior to approval and establishes the maximum amount of credit exposure per customer. The creditworthiness and financial well-being of the customer are monitored on an ongoing basis. As at June 30, 2024, three customers represented 18%, 14% and 10% of trade accounts receivable [2023 – three customer represented 27%, 13% and 11%]. In 2024, two customers represented 33% and 22% of sales [2023 – two customers represented 27% and 26%].

The Corporation establishes an allowance for doubtful accounts as determined by management based on its assessment of collection; therefore, the carrying amount of accounts receivable and contract asset generally represents the maximum credit exposure. The provision for doubtful accounts, if any, is included in the consolidated statements of loss and comprehensive loss. The majority of the Corporation's cash is held in accounts with Canadian banks. Management believes that the credit risk concentration with respect to these financial instruments is remote.

LIQUIDITY RISK

The Corporation's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. The Corporation's accounts payable and accrued liabilities have contractual maturities of less than 60 days and are subject to normal trade terms. Long-term debt has maturities between 1 to 3 years. The Corporation regularly evaluates its cash position to ensure preservation and security of capital and maintain liquidity.

As at June 30, 2024, management estimates that funds available are sufficient to meet the Corporation's obligations and planned net expenditures through at least June 30, 2025.

The Corporation has also provided unlimited suretyship and subordination on the long-term debt and operating loans of its subsidiaries.

The following table reflects the contractual maturity of the Corporation's financial liabilities as at June 30, 2024 (capital and interest payments):

Operating loans
Trade payables and accrued liabilities
Lease liability
Long-term debt
Total

	Contractual maturity

[EXPRESSED IN CANADIAN DOLLARS]

INTEREST RATE RISK

Interest rate risk refers to the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Corporation's policy is to limit its exposure to interest rate risk fluctuation by ensuring that a reasonable portion of its long-term debt is at fixed rate. The Corporation is exposed to interest rate fluctuations on its operating loans and long-term debt, which bear a variable interest rate. Based on the balances outstanding as at June 30, 2024, a 1% increase (decrease) in interest rates would increase (decrease) the Corporation's consolidated net loss by \$42,237 on a 12-month horizon.

The majority of the Corporation's cash and cash equivalent balances bear interest at variable rates. There is limited exposure to changes in interest revenues as a result of interest rate risk.

The Corporation's trade payables and accrued liabilities are non-interest bearing.

FOREIGN CURRENCY RISK

Currency risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Corporation has a credit facility allowing it to enter into forward foreign exchange contract transactions. This amount partially covers the Corporation's potential requirements over the next 24 months. The Corporation will proactively monitor the need to use this facility based on market conditions.

Foreign currency transactions originate from certain operations in the Corporation and its subsidiaries denominated in foreign currencies other than their functional currency. The following table provides a summary of the Corporation's exposure of foreign currency expressed in Canadian dollars as at June 30, 2024:

\$	\$	Total \$
482,728	2,772,014	3,254,742
968,517	13,810,642	14,779,159

280,567	6,203,618	6,484,185
1,024,321	10,977,778	12,002,099
(516,521)	(5,943,492)	(6,460,013)
_	(29,788)	(29,788)
788,367	11,208,116	11,996,483
	968,517 (288,538) — 1,162,707 Euro \$ 280,567 1,024,321 (516,521)	968,517 13,810,642 (288,538) (7,031,862) — (5,964) 1,162,707 9,544,830 Euro US dollars \$ 280,567 6,203,618 1,024,321 10,977,778 (516,521) (5,943,492) — (29,788)

For the year ended June 30, 2024, a variation of 3% in the Canadian dollar against the other currencies, assuming that all other variables had remained the same, would have resulted in a \$233,004 [2023 – \$270,333] net increase or decrease of the Corporation's consolidated net loss and comprehensive loss. The Corporation has hedged its exposure to US dollar currency fluctuations but does not apply hedge accounting as defined in IFRS 9.

CAPITAL MANAGEMENT

The Corporation's objectives in managing capital are to ensure sufficient liquidity to enable the internal financing of capital projects and to pursue its strategy of organic growth combined with complementary acquisitions, to maintain a strong capital base so as to maintain investor, creditor and market confidence and to provide long-term investment returns to its shareholders.

[EXPRESSED IN CANADIAN DOLLARS]

The Corporation manages its capital structure and makes adjustments in light of general economic conditions, the risk characteristics of the underlying assets and the Corporation's working capital requirements. In order to maintain or adjust its capital structure, the Corporation, upon approval from its Board of Directors, may issue or repay long-term debt, issue shares or undertake other activities as deemed appropriate under the specific circumstances. The Board of Directors reviews and approves any material transactions out of the ordinary course of business, including proposals on acquisitions or other major investments or divestitures, as well as annual capital and operating budgets.

In addition to debt and equity, the Corporation may use leases as additional sources of financing. The Corporation monitors debt leverage ratios as part of the management of liquidity and shareholders' return and to sustain future development of the business. The Corporation is not subject to externally imposed capital requirements and its overall strategy with respect to capital risk management remains unchanged from the prior year.

20. SEGMENTED DISCLOSURE

The Corporation's Chief Operating Decision Maker analyzes the information for the Corporation on two reporting segments, based on products:

- Advanced materials, plastics and composite products:

 Provides standard and custom graphene-enhanced plastic and composite products to various customers in transportation, packaging, electronics, and other industrial sectors
- Battery cells:
 Provides silicon-graphene-enhanced Li-ion battery for the Electric Vehicle and grid storage markets

The accounting policies of the segments are the same as the accounting policies of the Corporation.
